Language Learners Solution App
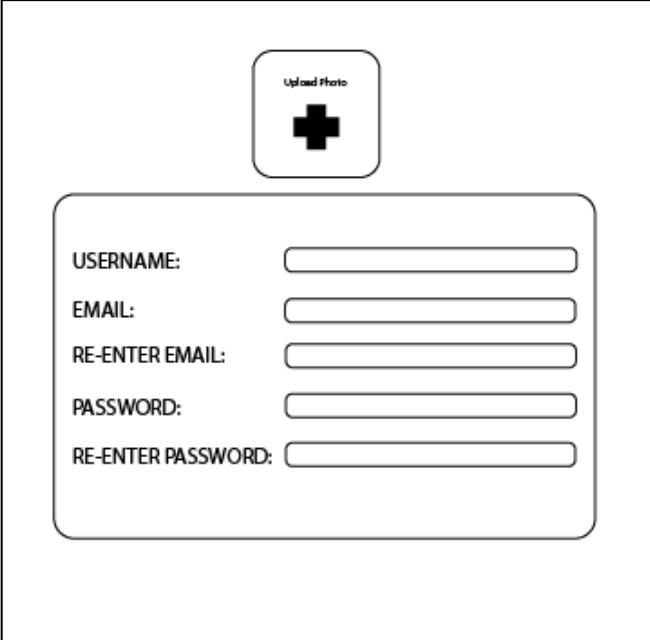

|	
Problem: Language learners have access to language learning apps, but little to no access to native speakers. **Solution:** Language Learners App (to be named) -- create an app that connects language learners to native speakers. The app will work like Skype and Duolingo combined.	
App Introduction: - App welcomes the user in their native language - App displays list of possible languages to learn	
New users register	

|	
Main screen - Shows information that learners and teachers will be able to see	HOMEPAGE Username: Native Language: Currently Learning: Badges Teachers Learners Quizzes Words Mastered
Available Learners - If users want to connect with other learners, or compare their progress to their friends, they can add friends or connect with other learners.	LEARNERS Home Teachers Quizzes Words Mastered
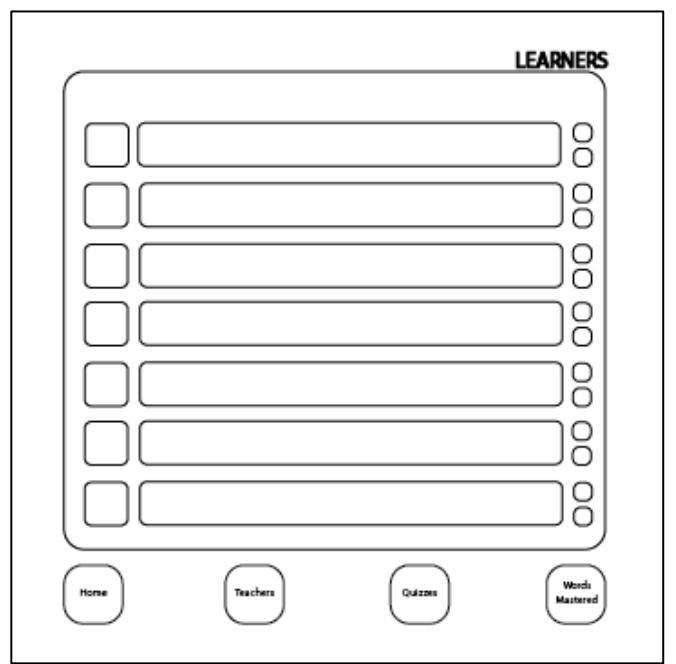

Available Teachers - Users can call the teacher with voice only, or voice and video - Users can see the teacher's picture and profile information	TEACHERS Home Learners Quizzes Words Mastered
Quizzes - Quizzes and associated badges displayed - List shows how much mastery was accomplished	QUIZZES Home Teachers Learners Words Mastered

Words Mastered
- Shows list of mastered words, date each word was mastered, and how long it took the student to learn each word
